18 Years of Experience

PROFESSIONAL SUMMARY

Backend Developer with strong experience building and supporting enterprise systems using Java, Spring Boot, APIs, SQL databases, scripting and integrations.

My DevOps and cloud experience helps me design backend services that are easier to deploy, monitor, troubleshoot and operate in real environments.

I have worked with Java, Spring Boot, Oracle PL/SQL, Transact-SQL, MongoDB, TypeScript, Python, Bash, Docker, Jenkins, Azure DevOps and AWS services. [Calendly](#).

EXPERIENCE

NOVEMBER, 2025 - CURRENT

TechnologyBots

BACKEND / CLOUD ENGINEER

Independent Contractor working on internal applications and supporting cloud infrastructure. From a backend perspective, I interact with TypeScript, PHP, Java and Python services while using Docker, AWS and Azure to make those applications deployable and operable in real environments.

APRIL, 2024 - NOVEMBER, 2025

INFOSYS - NextEra Energy

DEVOPS ENGINEER FOR JAVA APPLICATIONS

Supported the Java-based Phoenix application at NextEra Energy, managing deployments and operational readiness across Development, QA, Production and Disaster Recovery. The role required understanding the application lifecycle, release dependencies, service stability and automation around AWS, Docker, GitHub Actions, Python, TypeScript and Bash.

APRIL, 2021 - APRIL, 2024

DEVSU LLC - Banco Pichincha

BACKEND / DEVOPS CONSULTANT

Worked on Banco Pichincha services involving Java, TypeScript, SQL Server, ApiGee, Docker, AKS, Azure DevOps and Azure Pipelines. The experience combined backend service delivery, API management, database interaction, CI/CD and observability through Dynatrace.

OCTOBER, 2019 - JANUARY, 2020

CANVIA - Sunat

JAVA MICROSERVICES CONSULTANT

Worked on SUNAT services using Java, microservices, MongoDB, Google Firebase, Docker and Kubernetes. This experience is relevant to backend roles because it involved service-oriented applications, NoSQL storage and containerized runtime environments.

APRIL, 2018 - OCTOBER, 2019

EVERIS - Banco Sabadell

JAVA / ANGULAR CONSULTANT

Worked on Banco Sabadell services using Java, Angular, SQL Server, GlassFish, Jenkins, GitBucket and GitLab. The role combined application development/support with CI/CD practices and runtime troubleshooting.

FEBRUARY, 2020 - APRIL, 2021

QSYSTEM - Auna

BACKEND / API CONSULTANT

Supported Auna services using Java, TypeScript, Oracle DB, IBM API Connect, Swagger, JBoss EAP, AWS Lambda, DynamoDB, Cognito, CloudWatch, CloudFormation, Jenkins and Docker. The work touched API design/support, serverless components, database-backed services and deployment automation.

JULY, 2016 - JULY, 2017

SOA PROFESSIONALS PERÚ - Entel Perú

ENTERPRISE APPLICATION SUPPORT LEAD

Led server and middleware administration for Entel Peru, supporting Java and PL/SQL-based enterprise platforms on Oracle Database, WebLogic, Oracle Fusion Middleware, JBoss, SQL Server and MySQL. This background strengthens backend troubleshooting, database awareness and production support.

JUNE, 2015 - JULY, 2016

HACOM S.A.C.

TECHNICAL LEAD / SOFTWARE SUPPORT

Led the IT area while working with Java, Python, SQL Server, PostgreSQL, GitLab, WebLogic and Linux-based platforms. The role combined application support, database operations, scripting and infrastructure decisions for internal systems.

JANUARY, 2013 - JUNE, 2015

TEAMSFT - Nextel Perú

JAVA / ORACLE CONSULTANT

Supported Nextel Peru / Entel enterprise systems using Java, Oracle Database, Oracle WebCenter, Oracle WebLogic, Oracle OSB, SVN, Unix and Linux, with emphasis on middleware-backed backend applications.

AUGUST, 2012 - JANUARY, 2013

BIZ PARTNER - Aceros Arequipa

JAVA / ORACLE CONSULTANT

Supported Corporacion Aceros Arequipa systems using Java, Oracle Database and Subversion SVN, focused on enterprise application maintenance and database-backed development support.

JULY, 2011 - JULY, 2012

INTELYGENZ

JAVA SYSTEMS CONSULTANT

Supported multiple clients in Spain using Java, SQL Server, SVN, Linux and VMware, combining backend application support with deployment and environment maintenance.

JANUARY, 2010 - JUNE, 2011

CHAIN SERVICE TI - Hochschild Mining

JAVA APPLICATION SUPPORT CONSULTANT

Supported several Peruvian clients using Java, Tomcat, MySQL, PostgreSQL, Linux and SAP-related environments, forming a strong base in backend application servers and relational databases.
